

*Shockey Monkey*

**Kaseya  
Integration**

## Introduction

*This integration is relatively simple to configure and should take no longer than a few minutes. It will allow you to import all of the assets from your Kaseya platform into Shockey Monkey. It will also allow management of all Kaseya Tickets.*

## Shockey Monkey (Configuration)

1. Sign into your Shockey Monkey portal.
2. Click on the top menu, Settings → Integrations.
3. Next, select Kaseya from the drop down menu.

<b>Integration Management</b>  Product: <input type="text" value="Kaseya"/>	<b>Current Integrations</b>  ● No Integrations
---	--

<b>Kaseya Information - Step #2</b>	
	Kaseya Integration allows you to synchronize information from your Kaseya server into Shockey Monkey. Currently the integration supports synchronizing ( <i>tickets, machines and alerts</i> ).
URL: <input type="text"/>	
Example: <code>http://[External Server Address]/vsaWS/KaseyaWS.asmx?wsdl</code>	
Username: <input type="text"/>	
Password: <input type="text"/>	
<input type="button" value="Next"/>	

4. Enter the URL for your Kaseya Portal.
5. Enter the Username & Password for an administrative account.
6. Click Next.
7. Whenever you want to import/update the list of assets inside of Shockey Monkey. Return to this screen, Select Kaseya from the dropdown menu and press SYNC.
